

Cloud Native Security Co-Managed Service

Looking to maximize your cloud investments?

Engage AccessIT Group Cloud Services Team

AccessIT Group can help you navigate all of your cloud security needs. Our highly experienced cloud professionals leverage industry leading practices to implement and optimize cloud native solutions for your environment. By engaging the AccessIT Group Cloud Services team, you can be confident about using powerful cloud technologies.

Cloud Native Security Platform

- Cloud native security provides unified management for all your assets and workloads, giving you the confidence to automate security, prevent threats, and manage posture – everywhere – across your multi-cloud environment.
- Flexible security management tools ensure compliance while reducing configuration errors and potential breaches.

Privileged Identity Protection within Cloud Native Solutions

- IAM Safety hardens the AWS account console and restricts users from making unauthorized or accidental changes to account settings without the knowledge and authorization of an administrator.

Consider AccessIT Group Professional Services as an extension of your team!

Business Problems Solved

Lack of Visibility

Identity Access Management

Role Based Access Control

Cloud Infrastructure Misconfigurations

Unresolved False Positives

Lack of In-house Capacity or Expertise

Service Deliverables	Bronze	Silver	Gold	Platinum
